OUR MISSION AND VISION

- Mission:
To give a social impact with Supporting sustainable focused organizations and products to solve the environmental and social issues.
- vision:
Keep leading Sustainability for next generation.

BEHIND STORY OF YUKO

- In 2020, founder, Yuko saw one picture on a book. It showed how the **gender gap** goes and gave an impact on her. Therefore, she started to research and found that the number of female board member at listed companies in Japan is only 6%. Because she was in the 6%, this result meant she is in a unique position. Moreover, the **gender gap** indicates by World Economic Forum reported that Japan is in 120 of 156th. She has determined to support the next generation and solve the gender gap as her **mission**. Because gender equality is one of **SDGs target**, and she has educated at Harvard Business School online about sustainable business strategy, the **sustainable focus** became her **vision**.

She has 19 years experience of corporate management at Startup and listed companies, and 7years global business development experience within that.

BEHIND STORY OF KOJI

- Cofounder, Koji has had interested in **environmental issues solution** since he was very young and been targeting to **solve poverty**. His career vision was there, that's why he learned mechanical engineering and started his own business in the Philippines to create more opportunities and guide the way of solution. When he heard Yuko's business idea, he felt intuition and joined on this plan. As a father, he is willing to make a **better future** for the next generations.

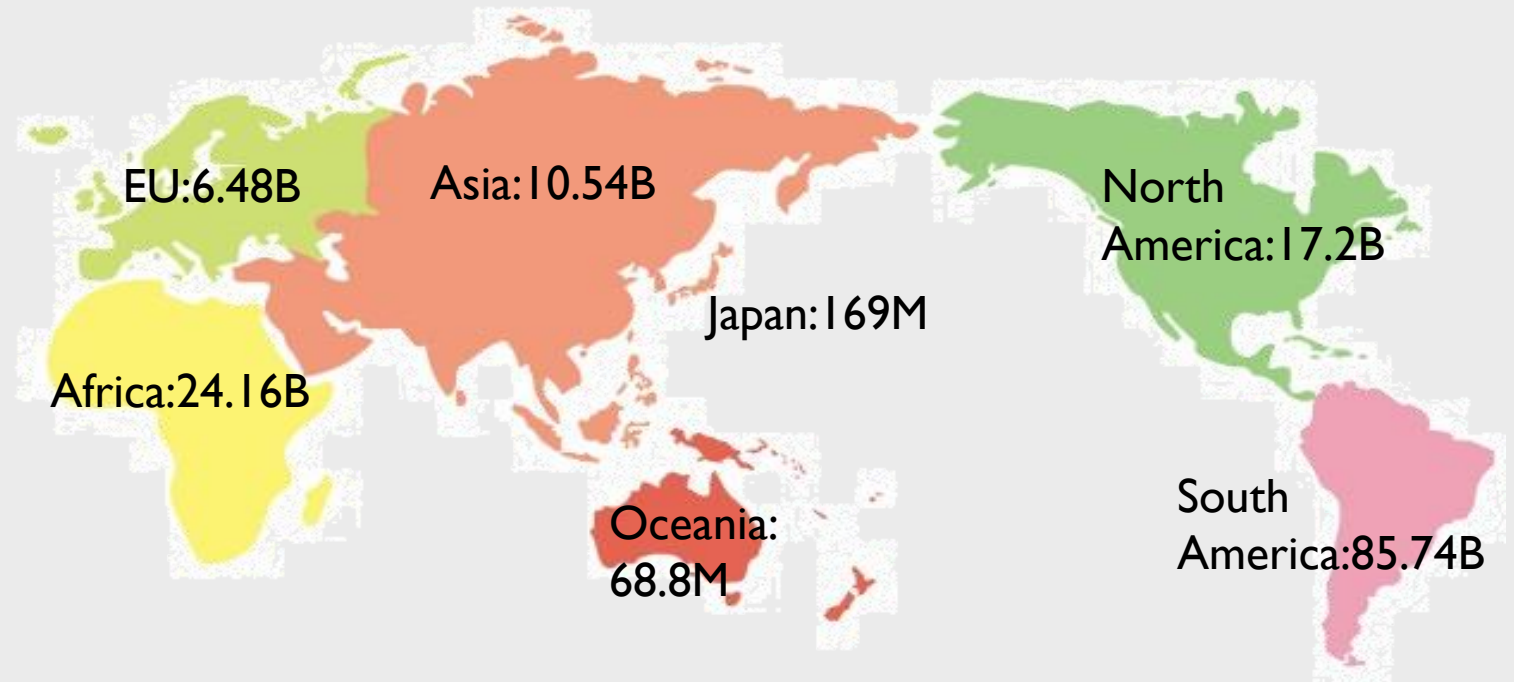

WE HAVE GLOBAL
MARKET VISION

■ Market size of crowdfunding (2019)

*Purchase, donation and investment whole type
FUNDLY, "Crowdfunding Statistics [Updated for 2020]

Whole world: 34 Billion USD
